CASE STUDY

The Institute of Electrical Engineers

The Institute of Electrical Engineers (IEE) is an innovative international organisation for electronics, electrical, manufacturing and IT professionals. It supports knowledge and education that will underpin engineering in the 21st century – it does this using specifically tailored products, services and qualifications to meet the needs of today's technology industry.

Due to its complex and intricate work, the IEE's head office requires sophisticated monitors to help electronically manage documents. They required monitors of a high resolution with rotatable screens and chose NEC Display Solutions to supply 200 20" monitors to meet this tough specification.

NEC Display Solutions Sales Director, Simon Jackson, said: "After beating off competition from Iiyama, Viewsonic and Dell, we were delighted that the IEE chose to purchase 200 NEC Display Solutions MultiSync® 2010X due to the monitors' high quality and reliability. The IEE were also impressed by the helpfulness and knowledge of the NEC Display Solutions staff which made making the decision an easy one."
