

CASE STUDY

Richard Rogers Partnership

By Their own Design!

Richard Rogers Partnership is a leading architectural practice employing 130 people worldwide and has its head office in London. The partnership has been responsible for some of the most recognisable buildings in the world and its diverse list of clients includes the Canary Wharf Group, British Airport Authority (Heathrow's Terminal 5), The Welsh Assembly (new parliament building in Cardiff Bay) and Channel 4 television.

During a refit of its head office, Richard Rogers was replacing its existing NEC Display Solutions and Sony CRT monitors and decided to upgrade to LCD monitors. As members of staff have to view technical architectural plans, the monitors required needed to be of the highest specification. Richard Rogers Partnership chose to purchase eighty MultiSync® LCD1980SX's and forty MultiSync® LCD1960NX's.

Having previously used NEC Mitsubishi CRT screens, they were confident of the quality and durability of these 19" screens.

NEC Display Solutions, Sales Director, Simon Jackson, said: "The quality of NEC Mitsubishi monitors speaks for itself when a leading architectural firm, a specialist in both ergonomics and design, choose NEC Mitsubishi time and time again."
